

## Yunus

### DC24V 4-20mA Immersion Type Pressure Sensor

Hydrostatic level sensor, DelcomRF Inc. It is one of the brands created by the company. YUNUS is a product that has proven its reliability in domestic public institutions and international automation applications. It has high resolution, stable current output. It gives you confidence thanks to its stainless steel body and low price, it has two options as 5 meters measurement distance and 6 meters cable, 10 meters measurement distance and 11 meters cable. It is a perfect product thanks to its sensor reading sensitivity adjusted with laser.

#### Genel Özellikler:

- It has a strong structure with a high quality stainless steel body that is resistant to bending and bending.
- Corrosion resistant.
- With its anti-blocking design feature, it tries to prevent the measurement points from being blocked.
- It has 4-20mA analog output.
- It can be used together with YUNUS Hydrostatic Level Sensor and PLC - HMI - INVERTOR and similar measurement applicators.
- It has L316 stainless steel structure.
- Suitable for detecting liquid level with 12 bit resolution.
- Measurement resolution 0.2FS
- Measuring material such as water, diesel, gasoline...
- Weight 510 gr.
- Probe size is 110 cm x 2.8 cm.

#### Usage areas:

Diesel, Gasoline, Water, Waste Water etc...
